Introduction

The purpose of this Report is to summarise activities and provide information on deliverables under WP1: Identifying workshop participants and WP2: Introductory Workshop of the CEeB Project "Promoting Co-operation of Central Europe in eBusiness" (no. IST-2000-31059).

The main objectives of activities released under the above Workpackages were to identify suitable organisations interested in opportunities in the IST Programme and to provide them with introductory information on the IST Programme, its content and procedures as well as to maximise participation in Key Action 2 of the IST Programme

In order to fulfil the objectives sets of promoting activities such as Internet campaign, e-mail campaign, phone campaign as well as entry questionnaire were released. There were two Introductory Workshops organised under WP2 by IFTR (PL) and UTIA (CZ). Therefore 129 (in total) participants from Poland and the Czech Republic working in the field of e-Commerce, e-Business and e-Learning have been identified and invited to the events performed under WP2.

The project start has been a little bit in press, but thanks to the Commission work the contract was received in time and the project was able to start immediately. Due to the above the deliverable list was modified in order to approach the deadline of the 8th IST Call. Therefore activities related to WP1 and WP2 have been performed in shorter time frame, which gave better opportunity to assist organisations wishing to participate in 8th IST Call of the Fifth Framework Programme.

The chapters below describe activities and deliverables concerning WP1 and WP2.

Supplementary Information on the Introductory Workshops including materials used during events are presented within the appendices at the end of the report.

1. Identifying Suitable Workshop Participants

Objective

To identify suitable organisations interested in the IST Programme opportunities.

Workpackage manager: Andrzej Siemaszko NCP (PL)

Workpackage leaders: Renata Burak NCP (PL) and Dana Feikova UTIA (CZ)

Duration: 1 month

Resources: 2 person-month

Description:

An important aspect of the work performed under WP1 was to maximise participation in Key Action 2 of the IST Programme. Due to that and approaching deadline of the 8th IST call we project timetable has been modified and activities performed in shorter time frame (1month).

The work under the work package was performed between 1 and 31 October 2001

In total 129 potential participants from the Czech Republic and Poland working in the field of eCommerce and eBusiness were identified and invited to workshops.

Activities related to WP1 have been accomplished successfully.

- **Identifying Suitable Workshop Participants in the CZ and PL**

In order to identify the most suitable participants for the introductory workshops and to prepare high quality events following activities took place:

Direct Mail Campaign

The activity was realised by sending envelopes with information about the event to around 7000 Polish IT companies (large and small), technology transfer agencies, regional development agencies, as well as to the prospective end users and research institutions.

E-mail Campaign

The activity was realised by sending information about the event to around 1100 IT companies in Poland and 600 e-mails to CZ IT companies, various institutions, universities and other organisations.

Internet Campaign

- Performed by IFTR and CUT

The activity was realised by creating the web site with information about the project:

<http://npk.gov.pl>

Type	Document	Subject		
Report	IST-2000-31059	Report on introductory Workshops and Participants		
Author(s)		Department	Date	Revision
Renata Burak and Dana Feikova		NCP-Warsaw	06-08-02	A

<http://www.pti.org.pl>

<http://www.transfer.edu.pl/CEeB/>

The event was also promoted via Ideal-IST network.

The web sites were intensively promoted in the National Contact Point Network.

- Performed by UTIA

The web page with English information about CEeB activities was created:

<http://www.utia.cas.cz/idealist-east/ISTcontacts/Ceeb/>

The information about CEeB activities has been declassified on Idealist Czech web pages <http://www.ideal-ist.cz/> as well as the CEeB activities have been advertised on the First Tuesday web pages <http://www.firsttuesday.cz/brno/>, and on the Czech Science web pages <http://www.veda.cz>

The database of Czech IT companies involved in KA2 was created.

Phone Campaign

The activity was realised by phone calls to over 180 organisations in Poland and 100 organisations in the Czech Republic.

Entry questionnaire

In order to develop high quality workshops to the benefit of all participants, an entry questionnaire has been designed. Therefore the phone interview with representatives of 86 organisations chosen for the event, was conducted between 12-16 October 2001 in Poland and the Czech Republic. The main objective of that activity was to define expectations of participants concerning workshops, which resulted in preparation high quality events, most beneficial for participants.

Through the interview, information on following topics was gathered: company information (contact name, organisation, address, phone, e-mail, web page), business profile, EU projects experience, expectation from the workshop (creation of successful project proposal, searching for additional partners, joining the existing/running projects, consultancy: project management, others). The information was used for preparation of the participants' lists with profiles.

Analysis of information

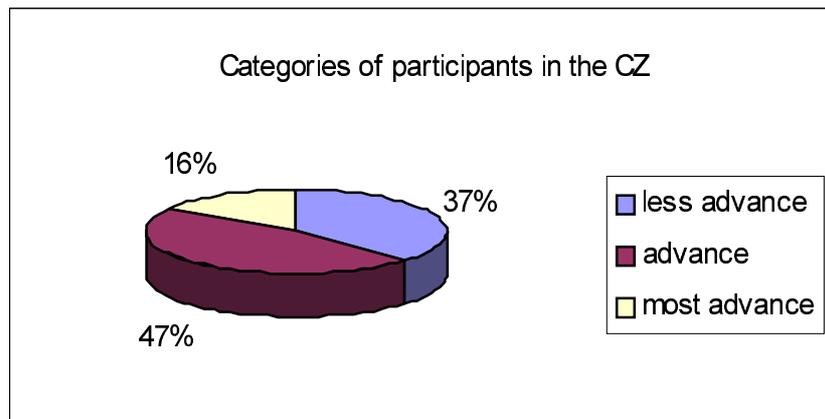

All information gathered from participants were analysed through which 3 targets groups were defined in the Czech Republic and Poland:

- Less advanced - participants wanting to join EU project but having limited knowledge about the Fifth Framework Programme, IST Programme, Action Lines, etc.
- Advanced – Participants having some knowledge concerning IST Programme

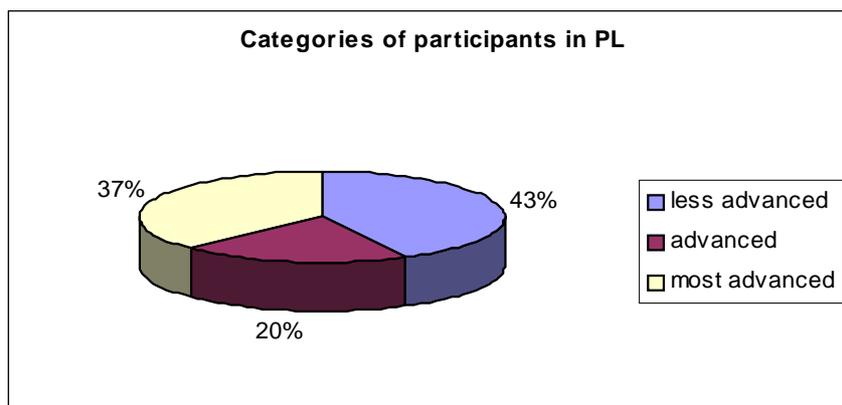

Type	Document	Subject		
Report	IST-2000-31059	Report on introductory Workshops and Participants		
Author(s)		Department	Date	Revision
Renata Burak and Dana Feikova		NCP-Warsaw	06-08-02	A

- Most advanced - Participants having knowledge about IST Programme already, who participated in the EU projects, having project idea but facing some problems, which enable to create a successful proposal.

The majority of identified participants in the Czech Republic represent participants coming from two categories: advanced (47%) and less advanced (37%).

However in Poland most of identified participants represent such categories as less advanced (43%) and most advanced (20%).

The results of the interview concerning expectations of workshop participants are presented in the table below.

Type Report	Document IST-2000-31059	Subject Report on introductory Workshops and Participants		
Author(s) Renata Burak and Dana Feikova		Department NCP-Warsaw	Date 06-08-02	Revision A

Workshop expectation	No. participants In PL	No. participants in the CZ
Creation of successful project proposal	38	48
Searching for right partners (building-up the consortium)	18	12
Joining the existing/running projects,	19	21
Consultancy: project management	22	24
Others (help with preparation of proposal, information about Intellectual property Rights (IPR), survey of proposal ,etc.)	27	58

Tab. 2 Participants' expectations

The above results provided an important information, which helped organisers do to design high quality workshops, most beneficial for participants in Poland and the Czech Republic (depending on their expectations and level of advance). The information, which was gathered show that most of participants expressed they interest in learning to create a successful proposal although most of them have come for the majority representing advanced group (43%) in the Czech Republic and most advanced group (37%) in Poland. Therefore many of participants in the Czech Republic as well as in Poland were expecting face to face consultations concerning problems, which prevent them from preparation of successful proposals, master skills in proposal development or define project idea, learn how to find a potential project partner or join running project.

2.1.2 Conclusion

The implementation of project activities related to WP1 has been accomplished successfully. In total 129 participants (see Appendices 1,p24), representing five target groups (Technology transfer agencies, SME/IT, Regional Development Agencies, university researches, large IT companies) have been identified and invited to the introductory workshops in Poland and the Czech Republic. The information gathered through the interview provided necessary information for development of high quality workshops, most suitable for specific participants.

2. Introductory Workshops

Objective

Type	Document	Subject		
Report	IST-2000-31059	Report on introductory Workshops and Participants		
Author(s)		Department	Date	Revision
Renata Burak and Dana Feikova		NCP-Warsaw	06-08-02	A

To provide organisations with introductory information on IST Programme content and procedures

Workpackage manager: Paul Drath, Singleimage (UK)

Workpackage leaders: Renata Burak, NCP (PL) and Dana Feikova, UTIA (CZ)

Duration: 1.5 months

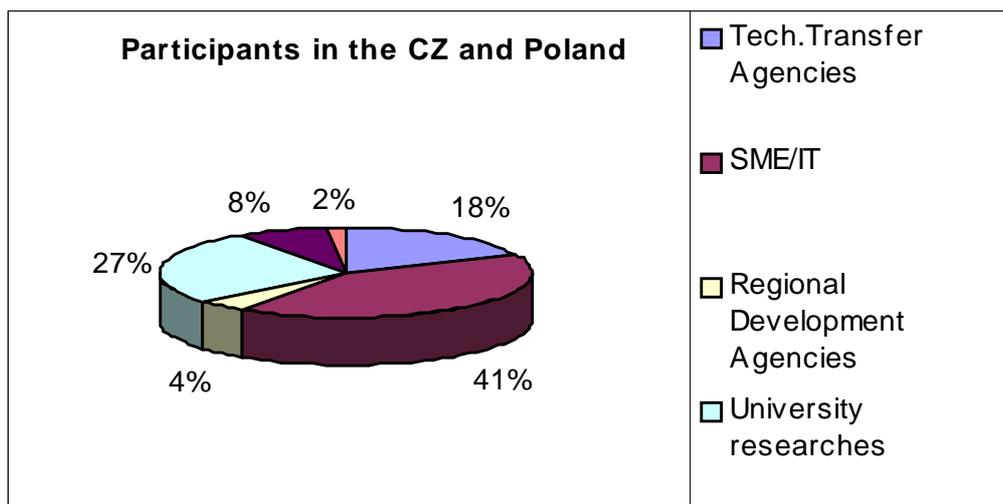

Resources: 2.5 person- months

Description

Two two-day workshops of a similar format were organised in the Czech Republic on 13-14 November 2001 and in Poland on 22-24 November 2001. Both workshops were designed for organisations, which wish to participate actively in the call 8, announced under the IST Programme of the European Commission. Therefore they learned about the IST Programme, Key Action 2, administration rules, partnering, evaluation process and criteria, etc.

In total 129 representatives of different organisations related to the IST sector, working in field of eBusiness and eCommerce participated in both events (see list of participants with profile- Appendix 1, p.24).

The chart below present number of participants from each category participated in both workshops.

The majority of workshops' participants have come from SMEs involved in e-Business , e-Commerce and Multimedia activities (41%), University researches (27%) ,Technology Transfer Agencies (18%) and Large IT companies (8%).

Type	Document	Subject		
Report	IST-2000-31059	Report on introductory Workshops and Participants		
Author(s)		Department	Date	Revision
Renata Burak and Dana Feikova		NCP-Warsaw	06-08-02	A

High participation of the above organisations (specially SMEs and Universities) could be explained by the fact that high standard information and communication facilities, active assistance in partner search, provision or managerial and technical advice, support for better utilisation of RTD capabilities by SMEs are urgently needed in the period of industrial transformation in Poland and the Czech Republic.

Participation in the EU projects including technology transfer will increase technology standards of many Polish and Czech organisations (including SMEs), what, in the future, will be a platform effective co-operation and partnership on the European market. Benefits for universities and research institutions come from finding proper partner for RTD co-operation, promoting and disseminating research results. Polish and Czech organisations involved in e-Business and e-Commerce would like to benefit from the transfer of the new modern technologies.

Through participation in workshops:

- Polish and Czech universities and research institutions expected to be able to participate in the IST Programme, to promote and disseminate results of research, to transfer innovative technologies from their laboratories to industry, and to find proper partners for future research development and technology transfer,
- Polish and Czech industry organisations expected to be able to get access to research results, to express their needs and benefit from transfer of the available development technologies.

Activities related to WP2 have been accomplished successfully.

There were no postponed or unrealised activities or negative feedback from participants.
